- Platform listing on other major Token markets in a 90 days period.

### WHAT ARE THE MAIN ADVANTAGES OF GFC E-AUCTION NETWORK?

GFC National Agri-food e-auction platform (NAP) is a unique initiative established in Greece. It integrates & coordinates the actual Agri-food spot markets with the nationwide network of product supply, cold storage logistics, SPs, CQ agencies and Transport companies to provide rapidly the best quality product at your doorstep.

GFC e-auction platform will be a huge step to empower Greek farmers. Traders will bid online from anywhere in the world and farmers & farmer's association will have secure product flow and a fair price for their products. This will lead to "scientific" price discovery by the farmers themselves, breaking the hold of middlemen.

The new online National Agricultural Platform (NAP) of GFC will allow the GPs (Group of Producers) to access directly International markets and to create economies of scale, increasing their sales & profit without the risk of capital, and contributing to the quality and packaging process. The new online sales platform will allow growers to focus exclusively on their production and invest in new opportunities in the fields of cultivation, sustainability and quality, having secured the flow of their products. Its members will be able to benefit from economies of scale, and make better use of marketing.

---

### HOW MUCH TOKENS ARE FOR SALE?

We are selling 50 Million GFC Tokens.

Hard Cap: 25.000.000 €. No soft cap.

## WHY GFC PROJECT CAN SUCCEED?

GFC project has an actual value and can succeed because it has immediate application in the real world, the real market, and the real economy.

GFC concept & functionality is based on a proven and working product/technology which brings solution to the long time problems faced by Greek farmers. More than 150 e-auction houses for Fruits & vegetables and other Agro-commodities have been implemented in Europe for many years by aucxis Belgium ([www.aucxis.com](http://www.aucxis.com)) with success. E.g. BelOrta e-auction house in Belgium, with a turnover of +450 million per year (<https://www.belorta.be/>).

It brings a real Solution in order to cover a real need: GFC infrastructure is providing a Real solution to the Agricultural sector & the farmers of Greece, bringing supply & demand together in a transparent way, and securing product flow and a fair price for both the suppliers & buyers.

GFC has secure adequate participation from the Nationwide Suppliers (group of producers & major farmer's collectivities), making the project viable.

GFC project is a valuable long term project that can support its Token to perform better and better each year. Therefore, there is value in holding it (=dividend share, inflation benefits).
